Arboretum

Points of interest:

- The original aviaries were built during 1890/1 and the circular aviary was built in 1892. One of the first birds introduced into the aviaries was a Sulphur-Crested Cockatoo named 'Cocky' who lived to be 114 years old
- The Victorian flowerbed was refurbished in 2001 and the design and species mix in this bed is varied regularly
- The bandstand was moved from the grounds of Nottingham Castle in 1881, and was placed in its current position in 1915. The bandstand plays host to a number of performances throughout the summer
- The Bell tower was constructed in 1862-3 and commemorates two unrelated military campaigns. The Crimean War of 1854-6 and the China War of 1856-60
- There is a tree trail around the Arboretum which signposts a variety of trees around the park; a leaflet with a map of the tree locations and information is available from www.nottinghamcity.gov.uk/parks

Arboretum Lodge Waverley Street, Nottingham, NG7 4HF.
